

# Boost the financial health of your company with a business solution from Microsoft

## Make managing your finances a breeze

Take the chaos out of closing the books – with greater control and insight, you can be confident your financial facts and figures are in order without spending weekends at the office.

## Get the most out of your money

Automate and shorten your order to payment processes and better manage your cash flow with the most accurate picture of your funds – from deposits and debits to reconciliations and receivables.

## Use the power of the cloud on your terms

Spend less on software and system maintenance while giving users greater flexibility to be productive virtually anytime, anywhere – on the device of their choice.

## Adapt to regulatory requirements

Be accountable, be adaptable, and be ready. When regulations and requirements change, your systems can help you stay compliant without busting your budget.

Shock Doctor, a Microsoft Dynamics customer, reduces hours spent on month end close by **50%** and cuts **400 hours** per year from transaction processing. [Read how.](#)

## Put your data to work

Turn reams of data into role-relevant insight. With real-time information at your fingertips you and your people can make quick, confident decisions that drive results for your business.

A business solution from Microsoft helps you manage your financials, supply chain, and operations – with the power to support your growth ambitions. Start with what you need today and easily add as your needs change. In the cloud or on your servers – the choice is yours.
